

NEOREST® WX

# PURE LUXURY

EN

**TOTO**

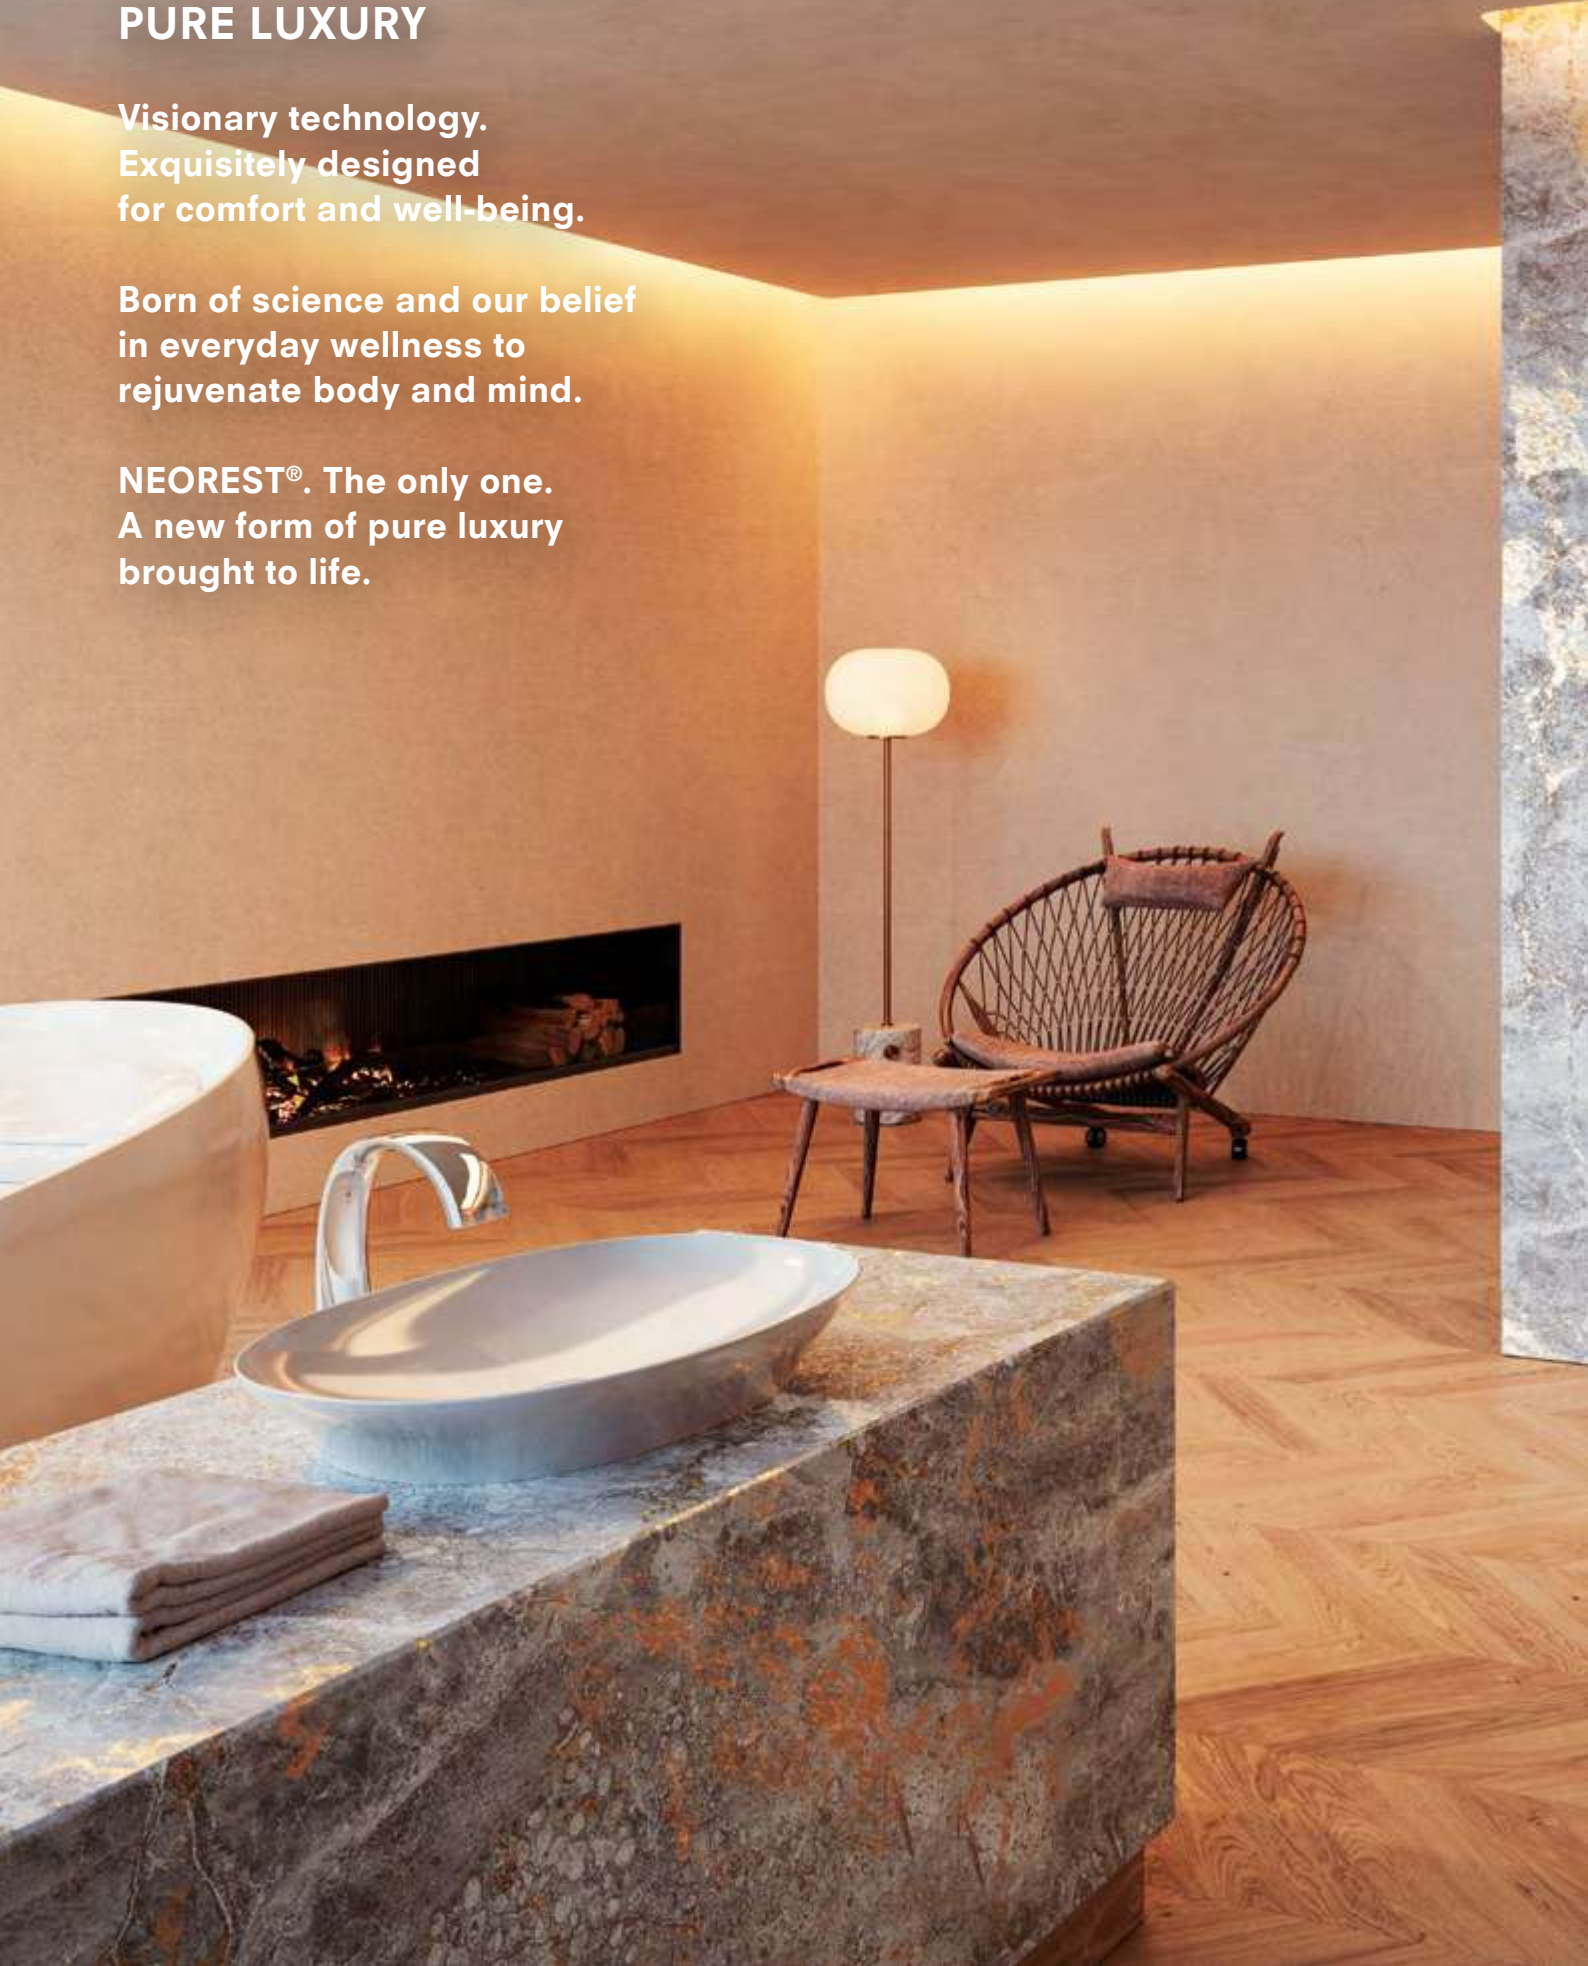

## PURE LUXURY

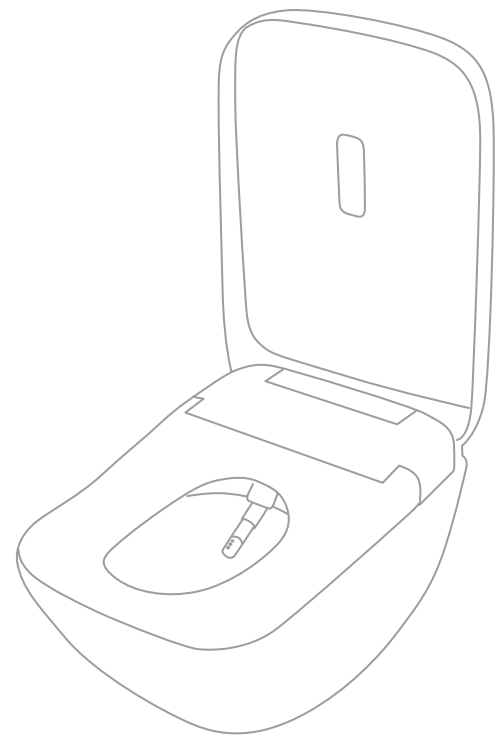

Visionary technology.  
Exquisitely designed  
for comfort and well-being.

Born of science and our belief  
in everyday wellness to  
rejuvenate body and mind.

NEOREST®. The only one.  
A new form of pure luxury  
brought to life.

# 完璧 – THE JAPANESE ART OF PERFECTION

Perfection is a philosophy in many areas of life in Japan. This is reflected in people's everyday lives, how food is served or the perfect choreography that goes into a tea ceremony. It also plays a role in industry, where people follow the philosophy of Kaizen as a methodological concept in their work. At its heart is a striving for constant, never-ending improvement, optimisation and perfection.

NEOREST® WX follows this very same tradition. With over 40 years of WASHLET® production and over 60 million models sold, we have devoted all our experience and knowledge into this NEOREST®. It features all technologies from our latest WASHLET® generation in a design that cleverly conceals the state-of-the-art inner workings.

## NEOREST® WX1

The new NEOREST® WX1 model is among TOTO's premium products featuring all of the familiar latest generation WASHLET® hygiene and comfort technologies.

## PERFECTION IN DESIGN AND FUNCTION

The design is rounded and harmonious. From the outside, WASHLET® and the ceramic form a cohesive unit without corners and edges, as if created in a single mould.

No compromises were made to negatively impact either the design or technologies. The ceramic hides all the technical equipment, elegantly concealing the many special functions of NEOREST® WX1 from view.

## TECHNOLOGIES AND FEATURES FOR THE BEST POSSIBLE HYGIENE AND COMFORT

- EWATER+ to clean the nozzle and toilet after use, keeping dirt and waste from collecting and even reducing bacteria.
- PREMIST sprays a mist of water onto the toilet before use, which makes it difficult for dirt and waste to stick.
- Wand jet positioned above the ceramic, protective flap separates the wet areas for greater hygiene
- Optimised ceramic composition for greater precision, minimising tolerances after the firing process
- Seamless seat ring
- Clean resin, silicone-based material to protect the wand jet, seat and functional unit
- AUTO FUNCTIONS automatically raise the lid and flush the toilet. Sensors can be adjusted to five different distances. The 3 l or 4.5 l flush activates based on time spent sitting.
- Adjustable reaction radius for the lid sensor
- Automatic nightlight with fade on/off feature
- HEATED SEAT with adjustable temperature
- Larger ergonomic seat for more comfort
- DRYER with adjustable heat settings
- WARM WATER NOZZLE with individually adjustable wand system for intimate cleansing (water temperature, spray strength and position); self-cleaning
- Descaling function (with automatic descaling programme)
- DEODORIZER with air-cleaning activated charcoal filter system
- Power-saving feature with timer for three, six or nine hours
- Registers user habits and switches to energy-saving mode accordingly
- Memory function for four people
- Remote control in four languages (German, English, French and Italian)

\*\* Required accessory: Frame system for WASHLET® with automatic flush by TOTO.

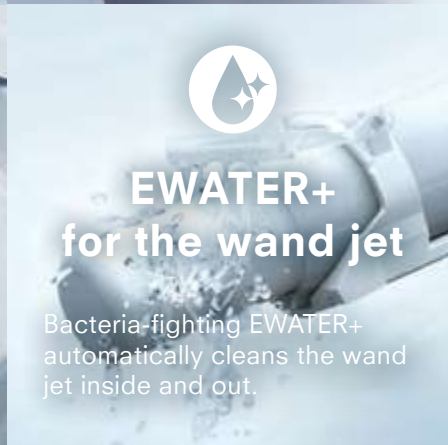

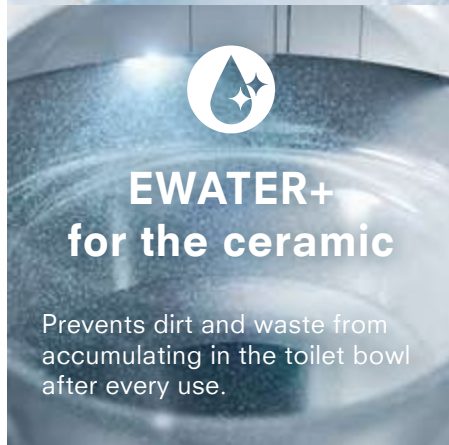

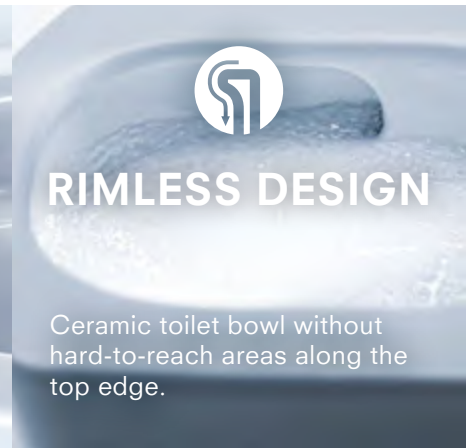

## CLEAN TECHNOLOGY

Read more about our technologies on our website [eu.toto.com/en/technologies](https://eu.toto.com/en/technologies)

## CLEAN TECHNOLOGY

TOTO developed their own specialised technologies to achieve the ultimate clean. You can count on the best possible hygiene – with every use.

## COMFORT TECHNOLOGY

User-friendly features provide the greatest possible comfort, enable an absolute feel-good experience and increase the quality of life – bringing more well-being into people's everyday lives.

### AUTO FUNCTIONS

Sensors automatically raise and lower the lid when someone approaches NEOREST®.

### WARM WATER NOZZLE

The precise, adjustable stream of water keeps you comfortably warm and clean.

### AUTO FUNCTIONS

Automatic, touch-free flush activates large or small flush based on time spent sitting.

### HEATED SEAT

Provides comfortable, adjustable seat temperature at all times.

### DEODORIZER

Air-cleaning activated charcoal filter system eliminates unpleasant odours during and after use.

### DRYER

Adjustable dryer ensures comfort after warm-water cleansing.

## FLOTATION TUB

Wellness meets the highest design standards

People all around the world know that Japan has an extraordinary bathing culture. Here, people clean more than just their bodies – they also cleanse their souls.

### Relaxation for body and spirit

The inside of the tub has a special shape that puts the body in the position it would naturally assume if weightless. This is especially relaxing for muscles and joints.

Research shows that the position a person's body assumes in the ZERO DIMENSION bathtub reduces activity in the part of the brain responsible for speech. This very relaxing feeling is comparable to the effects of meditation.

### Comfort features

- Water cascades around the height-adjustable neck pillow, keeping the shoulders comfortably warm
- Air jets massage the legs, promoting the feeling of weightlessness
- HYDROHANDS massage for the lower back
- Relaxing LED light
- Control panel in the bathtub makes it easy to use the different massage functions

### FLOTATION TUB\*

**VESSEL TL\***

round

**Colour:** white**Material:** Linearceram**Dimensions:** 600 x 420 x 117 mm**Product code:** L4706E#XW

**Technologies:**  
 CEFIONTECT  
 LINERCERAM

## VESSEL TL

Highly durable ceramic in a delicate, slim-edge design

**Less material, but just as durable: TOTO developed the truly unique LINEARCERAM technology for their washbasins.**

LINEARCERAM makes it possible to achieve the same level of stability with less material. Combined with the special CEFIONTECT glaze, the thin-panelled ceramic unites minimalistic design with the high quality people associate with TOTO.

## AUTOFAUCET

Elegant, curved design, with sensor-based activation for top hygiene

**The sensor on our automatic faucet is nearly invisible at the end of the spout.**

The highly sensitive sensor registers hand movements directly in front of the spout, which pours the right amount of water.

SOFT FLOW technology produces an especially gentle stream of water that slides gently over the hands, minimising splashing or spray. A sensor on the side of the faucet makes it easy to change the temperature.
